Abstract

This workshop focuses on the process of developing Urdu WordNet. WordNet is a large lexical database. Nouns, Verbs, Adjectives and Adverbs are grouped into synsets. The process includes selecting words, identifying their senses and documenting their use. It also ties the Urdu senses with corresponding senses in English. The workshop aims at presenting developing experience about the lexical resource for Urdu language that can be used in natural language processing. Moreover, the workshop focuses on giving hands on experience of Urdu WordNet training using merge approach.
