EGD Urdu Localization Project - Grammar Rule Document

Analysis: Following is the in-depth analysis of the rule.

Analysis:
The PRED (predicate) of the cardinal is its logical form. In case of cardinal, the PRED of cardinal is same as physical form of a word e.g., in the sample lexical entry, the PRED of 'ایک' is "ایک" and similarly the PRED of 'تین' is 'تین'
Number of a cardinal can be singular (SG) or plural (PL). It is a mandatory feature.

Result: We decided on above Analysis.

Future Work: We'll add more to this POS later on.
